FOR TOMORROW

A B2B partner for energy, hydration,
function and flavour — across cans, glass, PET, retort
and 7th layer aseptic.

FROM THE FOUNDER'S DESK

Beverages, made the way modern brands deserve.

At Olahey Wellness, we don't see a beverage as just a drink — we see it as a daily ritual the consumer trusts. That trust begins inside our manufacturing lines. Our beverage division has been engineered as a single roof solution — formulation, sourcing, processing, packaging and export. Whether your product is a high-caffeine performance shot, a clean-label kombucha, a retort-stable hydration drink for institutional supply, or an aseptic juice in 7-layer Tetra cartons for ambient distribution, we have the line, the chemists and the documentation to deliver it. This catalogue is our handshake. It outlines the eight core beverage categories we manufacture under contract, the additional adjacent categories we recommend, and the four distinct packaging philosophies behind them.

We invite you to build your next launch with us.

Dr. Munir Chandniwala

Founder & CEO · Olahey Wellness Pvt Ltd

AT A GLANCE

A liquid-format CDMO for the new beverage economy.

8 CORE CATEGORIES

21⁺ READY TO-LICENCE SKUs

4 PACKAGING FORMATS

30⁺ EXPORT READY COUNTRIES

Built on three operating pillars.

Formulation Studio

Our in-house R&D team builds bespoke recipes — energy systems, electrolyte stacks, botanical extracts, prebiotic fibre matrices, low-sugar architectures, clean-label preservatives.

Export & Documentation

We ship under your brand to GCC, Africa, ASEAN and the US. Regulatory dossiers, COAs, MOAs and labelling artwork are part of the deliverable.

Multi-Format Lines

Carbonation, hot-fill, cold-fill, retort sterilisation and aseptic 7-layer Tetra filling — all under one GMP roof, with allergen and HALAL/HACCP zoning.

RTD Protein & Recovery Shakes

CATEGORY 01 · STIMULANT BEVERAGES

ENERGY DRINKS.

Performance liquids engineered for caffeine, focus and recovery — from gym-floor classics to next-gen nootropic shots.

WHAT IT IS

A high-velocity category where formulation precision matters more than flavour. Our energy line is built on a controlled caffeine ladder (80mg, 150mg, 200mg, 300mg per serve) layered with taurine, B-complex, ginseng, guarana, L-theanine, citicoline and adaptogens. We engineer for both mass-market 250ml cans and the premium 60ml functional shot format. Sugar-loaded, zero-sugar (sucralose / stevia), and clean-caffeine (green coffee bean) variants are all supported.

SPECIFICATIONS

Format	Can / Glass / Shot
Values	60 / 250 / 330 / 500ml
Shelf Life	12-18 months
Process	Carbonation + Hot-fill
Moq	10,000 cans / SKU
Lead Time	30-45 days
Compliance	FSSAI · HALAL · HACCP

PACKAGING: ALU CAN · GLASS · PET SHOT

READY-TO-LICENSE SKU PIPELINE

- ✓ Classic Energy 250ml Can — taurine + caffeine + B-vitamins (FSSAI compliant 145mg cap)
- ✓ Sugar-Free Energy 250ml Can — stevia/sucralose, zero-calorie positioning
- ✓ Pre-Workout Energy 330ml Can — beta-alanine, BCAA, caffeine 200mg, electrolytes
- ✓ Nootropic Focus Shot 60ml — L-theanine, lion's mane, alpha-GPC, caffeine 150mg
- ✓ Recovery Energy 250ml — caffeine + magnesium + electrolytes for post-workout
- ✓ Natural Energy 250ml — green tea + guarana + yerba mate, no synthetic caffeine

CATEGORY 02 · CSD & SPARKLING

CARBONATED DRINKS.

From cola classics to craft sparkling — the science of bubbles, balanced acidity and shelf-stable colour.

WHAT IT IS

Our CSD (Carbonated Soft Drink) line runs on a calibrated CO₂ injection system delivering 2.5 to 4.5 volumes of carbonation depending on style — soft cola, crisp lemon-lime, or aggressive ginger ale. We support both syrup-room blending (5+1 / 6+1 ratios) and ready-to-fill bulk syrup formats. Beyond mainstream cola and lemon, we develop craft sparkling beverages with botanical extracts, real fruit puree, and reduced-sugar architectures using stevia/erythritol/allulose blends. Glass bottles deliver the premium hand-feel; aluminium cans deliver the export economics.

SPECIFICATIONS

Format	Can / Glass / Shot
Values	200 / 250 / 3000 / 500ml
Shelf Life	9–12 months
Process	Co2 Carbonation
Moq	15,000 units / SKU
Lead Time	25–40 days
Compliance	FSSAI · HACCP

PACKAGING: ALU CAN · GLASS · PET SHOT

READY-TO-LICENSE SKU PIPELINE

- ☑ Cola 250ml/300ml Can & 200ml RGB Glass
- ☑ Lemon-Lime Sparkling 300ml Can — natural lemon oil + lime extract
- ☑ Orange Carbonated 250ml Can — 5% real juice + carotenoid colour
- ☑ Sparkling Ginger Ale 250ml — fresh ginger oleoresin, low sugar
- ☑ Craft Sparkling — Pomegranate / Guava / Jamun (real fruit, glass bottle)
- ☑ Zero-Sugar Sparkling Cola 330ml — stevia + erythritol blend

CATEGORY 03 · HYDRATION

FLAVOURED WATER.

Where wellness meets hydration — clean-label, low-calorie, and unapologetically refreshing.

WHAT IT IS

The fastest-growing hydration sub-segment globally. Our flavoured water platform is built on triple-purified RO water as the base, infused with natural fruit essences, botanical extracts and a controlled mineralisation profile (calcium, magnesium, potassium). Three architectures are offered — Still Flavoured Water (uncarbonated PET bottles), Lightly Sparkling Flavoured Water (1.5 vol CO₂ in glass or can), and Vitamin-Enhanced Flavoured Water (B & C vitamin fortification). Sugar-free by default; we use stevia, monk fruit and erythritol systems. Crystal-clear, zero-haze, no sediment.

SPECIFICATIONS

Format	Pet / Glass / Shot
Values	200 / 330 / 500 / 1000ml
Shelf Life	9–12 months
Process	Cold-fill / Hot-fill
Moq	12,000 bottles / SKU
Lead Time	25–40 days
Compliance	FSSAI · BIS · HACCP

PACKAGING: PET · GLASS · ALU CAN

READY-TO-LICENSE SKU PIPELINE

- ☑ Still Flavoured Water 500ml PET — Lemon-Cucumber / Watermelon-Mint / Peach
- ☑ Lightly Sparkling Flavoured Water 330ml Glass — Yuzu / Bael / Rose-Lychee
- ☑ Vitamin Water 500ml — B-complex + Vit C, fruit punch / berry blend
- ☑ Coconut Infused Water 500ml — coconut + pineapple + lime
- ☑ Kids' Flavoured Water 200ml PET — apple, mixed fruit (no preservatives)
- ☑ Alkaline Flavoured Water 1L PET — pH 8.5+, mild lemon

CATEGORY 04 · MIXERS

SODA & TONIC WATER

Premium adult mixers — the silent partner in every cocktail, mocktail and fine-dining table.

WHAT IT IS

A rapidly premiumising category in India and the GCC, driven by HORECA, lounge bars and the home-bar movement. We manufacture clean, neutral-base club soda; quinine-balanced tonic water with controlled bitterness; and a craft tonic range featuring botanicals such as juniper, rosemary, kaffir lime leaf and pink peppercorn. Our line supports premium 200ml slimline glass bottles (the bartender format), 250ml cans for export, and economical 750ml glass for HORECA. Quinine sourcing is pharma-grade with full traceability.

SPECIFICATIONS

Format	Slimline Glass
Values	200 / 250 / 750ml
Shelf Life	18 months
Process	Carbonation + RGB
Moq	8,000 Bottles / SKU
Lead Time	30–45 days
Compliance	FSSAI · HALAL · HACCP

PACKAGING: ALU CAN · GLASS · PET SHOT

READY-TO-LICENSE SKU PIPELINE

- ✓ Classic Club Soda 200ml Slimline Glass — neutral, high-CO₂ (4.5 vol)
- ✓ Indian Tonic Water 200ml Glass — pharma-grade quinine, balanced bitterness
- ✓ Diet Tonic Water 200ml — stevia-sweetened, zero-calorie
- ✓ Elderflower Tonic 200ml — natural elderflower extract
- ✓ Mediterranean Tonic 200ml — rosemary + thyme + pink pepper
- ✓ Ginger Beer 250ml Can — fermented-style, fiery ginger heat
- ✓ Bitter Lemon 200ml Glass — Sicilian lemon oil + quinine

OLAHEY WELLNESS PVT LTD · Beverage Manufacturing Division

CATEGORY 05 · WELLNESS-FORWARD

FUNCTIONAL DRINKS.

Mass-affordable, family-table beverages built for high throughput and price-sensitive distribution.

WHAT IT IS

The volume backbone of any beverage portfolio. Our soft drinks line spans the classic Indian 'cold drink' spectrum — orange, jeera, masala, kala khatta, raw mango, rose, khus and shikanji. Both carbonated and non-carbonated formats are available. We engineer soft drinks for tiered price points: a premium glass-RGB tier, a mainstream PET 600ml tier, and an institutional/ HORECA 1.25L party-pack tier. Sugar profiles can be calibrated from full-sugar (10–11° Brix) down to low-sugar (4–6° Brix) depending on target market.

SPECIFICATIONS

Format	PET / Glass / Tetra
Values	200 / 250 / 600 / 1250ml
Shelf Life	6–12 months
Process	Carbonation / Hot-fill
Moq	20,000 units / SKU
Lead Time	20–35 days
Compliance	FSSAI · HACCP

PACKAGING: PET · GLASS RGB · TETRA

READY-TO-LICENSE SKU PIPELINE

- ✓ Jeera Masala Soda 200ml Glass — black salt, cumin, mint
- ✓ Indian Cola 600ml PET — full-sugar mainstream cola
- ✓ Orange Drink 600ml PET — non-carbonated, 5–10% real juice
- ✓ Kala Khatta 250ml — jamun + rock salt, cult Indian flavour
- ✓ Raw Mango Panna 200ml — kachi keri, mint, cumin
- ✓ Rose Sharbat RTD 250ml — gulab + cardamom, non-carbonated
- ✓ Shikanji 200ml — lemon + black salt + spice mix

OLAHEY WELLNESS PVT LTD · Beverage Manufacturing Division

CATEGORY 07 · FRUIT-FORWARD

JUICES & NECTARS.

From 100% pure to fruit nectars —
the full juice spectrum, packed in formats
that travel.

WHAT IT IS

Our juice platform is purpose-built around
shelf life and supply chain, not just flavour.
We support the full FSSAI juice taxonomy —
100% Pure Juice (no added sugar/water),
Fruit Drink (≥10% juice), Fruit Nectar
(25–50% juice depending on fruit),
and Pulpy Juice formats. Aseptic 7-layer
Tetra packaging gives 9–12 months
ambient shelf life without preservatives.
PET hot-fill suits cold-chain markets.
Fruit sourcing is pan-Indian — Alphonso
pulp from Ratnagiri, Totapuri from
Karnataka, pomegranate from
Maharashtra, guava from UP. We
can also handle exotic and tropical:
lychee, dragon fruit, passion fruit,
sea buckthorn.

SPECIFICATIONS

Format	Tetra / PET / Glass
Values	200 / 250 / 1000 / 1500ml
Shelf Life	9–12 months ambient
Process	Aseptic / Hot-fill / Retort
Moq	10,000 units / SKU
Lead Time	30–50 days
Compliance	FSSAI · HALAL · HACCP

PACKAGING: TETRA 7-LAYER · PET · GLASS

READY-TO-LICENSE SKU PIPELINE

- ☑ 100% Pure Mixed Fruit Juice 1L Tetra — apple/grape/orange base
- ☑ Mango Nectar 200ml & 1L Tetra — Alphonso/Totapuri blend, 30%+ juice
- ☑ Apple Juice 1L Tetra — clarified, no added sugar
- ☑ Pomegranate 200ml/1L Tetra — pure or with fibre
- ☑ Guava Nectar 200ml Tetra — pulpy, classic Indian profile
- ☑ Litchi Drink 200ml Tetra — premium tropical
- ☑ Sugarcane RTD 250ml Glass/Can — cold-pressed, retort-stable
- ☑ Coconut Water 200ml Tetra — natural, no preservatives

OLAHEY WELLNESS PVT LTD · Beverage Manufacturing Division

CATEGORY 08 · COLD BREW & TEA

ICED TEA & COLD BREW.

Tea, reimagined for the bottle — from the lemon-iced classic to nitro cold brew coffee.

WHAT IT IS

A category that blends tea craftsmanship with beverage manufacturing. We brew our iced teas at controlled temperature (90–95°C, 4–8 minutes) directly from leaf — Assam CTC for body, Darjeeling for top notes, sencha for green teas. Cold brew is steeped 8–12 hours for low-bitterness, naturally sweet character. We support both classic sweet iced tea (lemon, peach) and a premium unsweetened/zero-sugar craft tier. Cold brew coffee in cans, RTD chai latte in PET, matcha latte in glass, and kombucha-style fermented teas all sit on this platform. Hot-fill PET delivers cost; aseptic Tetra delivers ambient shelf life.

SPECIFICATIONS

Format	PET / Tetra / Can / Glass
Values	200 / 250 / 330 / 500ml
Shelf Life	9–12 months
Process	Hot-fill / Aseptic / Retort
Moq	10,000 units / SKU
Lead Time	30–45 days
Compliance	FSSAI · HALAL · HACCP

PACKAGING: PET · TETRA · CAN · GLASS

READY-TO-LICENSE SKU PIPELINE

- ✓ Lemon Iced Tea 250ml/500ml PET — Assam black tea base
- ✓ Peach Iced Tea 250ml — natural peach, low sugar
- ✓ Green Iced Tea 250ml — sencha + jasmine + honey
- ✓ Unsweetened Black Iced Tea 330ml Can — zero-sugar premium
- ✓ Cold Brew Coffee 200ml Can — Arabica, no sugar, no milk
- ✓ RTD Masala Chai Latte 200ml PET — milk-based, retort-stable
- ✓ Matcha Latte 250ml Glass — ceremonial matcha, oat milk option
- ✓ Hibiscus Iced Tea 250ml — caffeine-free, antioxidant-rich

OLAHEY WELLNESS PVT LTD · Beverage Manufacturing Division

ADJACENT CATEGORY ·
RECOMMENDED ADDITION

PLANT-BASED MILKS & MYLK LATTES.

A non-dairy revenue line that uses your existing aseptic Tetra and retort capacity — minimal new capex.

WHAT IT IS

We strongly recommend Olahey extends into plant-based milks, because the manufacturing logic is identical to juice and dairy beverages — the same homogeniser, sterilisation and 7-layer aseptic Tetra line is reused. Indian and export demand for almond, oat, soy and coconut milk is growing at double-digit CAGR. The category is also a natural carrier for functional claims (calcium-fortified, B12, protein-enhanced). It plugs you into the HORECA channel — every premium café needs an oat milk SKU. Recommended technology: dry-blend reconstitution + UHT aseptic filling.

SPECIFICATIONS

Format	Tetra / PET
Values	200 / 250 / 1000ml
Shelf Life	9–12 months ambient
Process	UHT Aseptic 7-layer
Moq	8,000 units / SKU
Lead Time	40–55 days
Compliance	FSSAI · VEGAN · HALAL

PACKAGING: TETRA 7-LAYER ASEPTIC · PET

READY-TO-LICENSE SKU PIPELINE

- ✓ Oat Milk Original / Barista 1L Tetra — froth-grade for cafés
- ✓ Almond Milk Sweetened / Unsweetened 1L Tetra
- ✓ Soy Milk Vanilla / Chocolate 200ml & 1L Tetra
- ✓ Coconut Drinking Milk 200ml Tetra — fortified
- ✓ Mixed Mylk Latte (Almond + Cashew) 250ml — premium
- ✓ Plant-Based Chocolate Milk 200ml — kids' segment
- ✓ Cold Coffee with Oat Milk 200ml PET — RTD café format

OLAHEY WELLNESS PVT LTD · Beverage Manufacturing Division

ADJACENT CATEGORY ·
RECOMMENDED ADDITION

KOMBUCHA, SWITCHEL & FERMENTED DRINKS.

The premium gut-health frontier — high margin, low competition, perfectly aligned to the wellness brand promise.

WHAT IT IS

Fermented beverages are the next decade's high-value category. Kombucha (fermented tea), Switchel (apple cider vinegar + ginger + maple), Water Kefir and Jun Tea are all supported on our line with a dedicated SCOBY/culture room and controlled-temperature fermentation tanks. These products carry premium retail shelf prices (₹150-250+ per 250ml in India, \$4-6 in export), have inherent gut-health functional claims, and sit naturally inside the Olahey wellness brand ladder. Live-culture vs pasteurised variants are both possible. Glass bottling is preferred for shelf-presence; aluminium cans for export economics.

SPECIFICATIONS

Format	Glass / Can
Values	250 / 330ml
Shelf Life	4-9 months chilled /
Process	pasteurised
Moq	Fermentation + cold-fill
Lead Time	5,000 bottles / SKU
Compliance	45-60 days
	FSSAI · HALAL · ORGANIC*

PACKAGING: GLASS · ALU CAN

READY-TO-LICENSE SKU PIPELINE

- ☑ Kombucha Original 250ml Glass — green tea base, 2nd ferment
- ☑ Kombucha Ginger-Lemon 250ml — bestselling flavour profile
- ☑ Kombucha Hibiscus-Rose 250ml — premium botanicals
- ☑ Kombucha Mango-Chilli 250ml Can — tropical export SKU
- ☑ Switchel 250ml — ACV + ginger + jaggery/maple
- ☑ Water Kefir 250ml Glass — dairy-free probiotic refresher
- ☑ Jun Tea 250ml — green tea + raw honey, premium tier

OLAHEY WELLNESS PVT LTD · Beverage Manufacturing Division

ADJACENT CATEGORY ·
RECOMMENDED ADDITION

RTD PROTEIN & RECOVERY SHAKES.

Where the Influx nutraceutical heritage compounds — protein you can already source, packed in a beverage you can already manufacture.

WHAT IT IS

The most strategically obvious adjacency. Olahey already imports and handles whey, casein, pea, soy and brown rice proteins through its nutraceutical operations. Combine that with our retort and aseptic capabilities, and an RTD (Ready-to-Drink) protein line is a near-zero-friction launch. We support 25g, 30g and 40g protein dosages, dairy-based and 100% plant-based formats, in shelf-stable retort tetrapack and chilled PET. The category is high-margin, high-recurrence, and brand-defendable. It also opens institutional channels — gyms, sports academies, defence/forces, hospitals.

SPECIFICATIONS

Format	Tetra / PET / Can
Values	200 / 250 / 330 / 500ml
Shelf Life	9-15 months
Process	Retort / Aseptic / Hot-fill
Moq	8,000 units / SKU
Lead Time	40-60 days
Compliance	FSSAI · NUTRA · HALAL

PACKAGING: TETRA RETORT · PET · CAN

READY-TO-LICENSE SKU PIPELINE

- ☑ Whey Protein Shake 30g 250ml — chocolate / vanilla / cookies & cream
- ☑ High-Protein 40g 330ml — pro-athlete tier, retort
- ☑ Vegan Pea+Rice Protein 25g 250ml — chocolate / berry
- ☑ Recovery Shake — protein + electrolytes + BCAA, post-workout
- ☑ Mass Gainer RTD 500ml — 50g carbs + 30g protein
- ☑ Meal Replacement Shake 330ml — 25g protein + fibre + 25 vitamins
- ☑ Kids' Protein Milk 200ml Tetra — 5g protein, calcium-fortified

OLAHEY WELLNESS PVT LTD · Beverage Manufacturing Division

PACKAGING PHILOSOPHY

FOUR FORMATS. ONE FACTORY.

A. UNCARBONATED

in PET / Glass Bottles

Still juices, flavoured waters, cold-pressed RTDs, hot-fill teas. Hot-fill or cold-fill technology. Cost-efficient, recyclable, retail-friendly.

B. CARBONATED

in Cans & Glass Bottles

CSDs, sparkling waters, energy drinks, mixers. CO₂-injected at 2.5–4.5 vol. Aluminium cans for export, glass RGB for HORECA premium.

C. RETORT-PROCESSED

Shelf-Stable Liquids

Pressure-sterilised at 121°C+. Ideal for milk-based teas, protein shakes, soups, dairy beverages. Up to 18 months ambient shelf life.

D. ASEPTIC TETRA

7-Layer Carton Filling

Juices, plant milks, dairy beverages, functional drinks. UHT + aseptic fill. 9–12 months ambient. Tamper-proof, low-light, low-oxygen.

FORMAT DEEP-DIVE

RETORT PROCESSING FOR 18-MONTH SHELF LIFE.

Retort sterilisation applies pressure (1.8–2.2 bar) and heat (121–125°C) to a sealed product, killing all spoilage organisms and Clostridium botulinum spores. The result: shelf-stable beverages that need no cold chain.

WHICH OF YOUR PRODUCTS BELONG ON THE RETORT LINE?

MILK-BASED TEAS & LATTES

Masala chai latte, matcha latte, cold coffee with milk — dairy proteins need retort-grade sterilisation.

RTD PROTEIN SHAKES

Whey/casein-based shakes at 30g+ protein. Without retort, these fail microbiologically within days.

SUGARCANE JUICE (RTD)

Naturally fermentable, oxidises rapidly. Retort = ambient stability without preservatives.

SOUPS & SAVOURY SIPPERS

Tomato shot, mushroom-broth shot, rasam shot — emerging functional savoury category.

COCONUT MILK DRINKS

Coconut beverages with pulp/cream content. Retort prevents fat separation and rancidity.

PULPY TROPICAL JUICES

Mango, guava, litchi with high pulp load — retort delivers texture stability.

PACKAGING PHILOSOPHY

SIX REASONS BRAND OWNERS CHOOSE US.

FORMULATION- LED, NOT CONTRACT-LED

Formulation-led, not contract-led

ALL FOUR PACKAGING FORMATS IN-HOUSE

Cans, glass, PET, retort, and aseptic
Tetra under one HACCP roof.

NUTRACEUTICAL- GRADE ACTIVES

Influx Healthtech heritage means
premium ingredient quality with
traceability.

EXPORT-READY DOCUMENTATION

GCC, US, ASEAN, Africa — COA,
MOA, regulatory dossiers included.

COMPLIANCE- FIRST CULTURE

FSSAI, HALAL, HACCP, GMP,
ISO 22000. Audit-ready at any moment.

SPEED WITHOUT SHORTCUTS

Pilot batches in 30 days.
Commercial production in 45–60 days.

HOW WE WORK

FROM YOUR BRIEF TO YOUR OTTLE — IN SIX STEPS.

Brief & Scoping

We map your concept against
our line capability, target
margins, target geography.

Formulation

R&D delivers 2–3 prototype
recipes. Sensory panel +
your team selects.

Pilot Batch

Lab-scale production. Stability,
microbiological and accelerated
shelf-life testing.

Artwork & Packaging

Label design, regulatory copy,
declaration matrix.
Printer co-ordination.

Commercial Run

First commercial batch. COA, MOA,
retention samples archived.

Dispatch & Repeat

FOB or CIF dispatch with all export
documents. Repeat orders
run on standing artwork.
